**B9 4US**  
**Required for September 2018**

Al-Hijrah School is a well established (4-16) Voluntary Aided Islamic Through School. The school is now driving rapidly towards the level of excellence that it wants to be part of. We are looking for an individual to support our drive towards this change.

Our Maths department has regularly performed above national average. However, to continue this immense progress, we need committed staff members who can support our drive for further improvements.

The school is looking to appoint a talented Teacher of Mathematics who can support our vision for this heavily oversubscribed school. The ideal candidates should possess a passion for this subject. They will also have the ability to engage our students and encourage them to go the extra mile to achieve their full potential. In return we provide a supportive organisation where pupils attend for the 'love of learning' alongside a friendly team of staff embedded within this unique community. We offer amazing students who are highly motivated, enthusiastic and ambitious.

As part of our drive towards supporting the teacher and work life balance, the department has developed a whole class feedback policy to replace the traditional marking. This now enables the teacher more time to plan quality first teaching in class.

Candidates must be dedicated to raising levels of achievement for all students as well as contributing to any activity that supports the school's overall aims and objectives outlined in the School Improvement Plan.

For further enquiries, please contact Mr Naseem Mughal, Head of Maths, 0121 773 7979.

Closing Date for Applications: Noon 11 /07/2017
